

Table of Contents

1. Modeling and Simulation Techniques

Virtual Prototyping Framework for Pixel Detector Electronics in High Energy Physics	7
Francesco Enrico Brambilla, Davide Ceresa, Jashandeep Dhaliwal, Stefano Esposito, Kostas Kloukinas and Jeffrey Prinzie	
Formal RTL Sign-off with Abstract Models.....	14
Lucas Deutschmann, Osama Ayoub, Rohith Batthineni, Michael Schwarz, Tobias Ludwig, Dominik Stoffel and Wolfgang Kunz	
A Roundtrip: From System Requirements to Circuit Variations and Back.....	20
Sören Kwasigroch, Nicolas Theobald, Johannes Koch and Christoph Grimm	
OpenCar: A SysML v2 Modeling Framework for Early Analysis of BoardNet Architectures	27
Sebastian Post, Johannes Koch, Aida Bevrnja and Christoph Grimm	
Automating the Use of State-Space Representations in Mixed-Signal IC Design and Verification	33
Francesco Stilgenbauer, Matteo De Ferrari, Cristiano Meroni, Giuseppe Ridinò, Cristian Macario, Paolo Stefano Croveti, Edoardo Bonizzoni and Piero Malcovati	

2. Verification and Testing Methodologies

Who checks the checkers? Automatically finding bugs in C-to-RTL Formal Equivalence Checkers.....	39
Michalis Pardalos, Alastair F. Donaldson, Emiliano Morini, Laura Pozzi and John Wickerson	
A Novel Approach in Proving Unreachable Paths in Hardware-dependent Software	45
Bryan Daniel Olmos Suquillo, Wolfgang Kunz and DJones Lettnin	
Trustworthiness Evaluation of Deep Learning Accelerators Using UVM-based Verification with Error Injection	51
Randa Aboudeif, Tasneem A. Awaad, Mohamed Abdelsalam and Yehea Ismail	
Enhanced VLSI Assertion Generation: Conforming to High-Level Specifications and Reducing LLM Hallucinations with RAG.....	57
Hafiz Abdul Quddus, Md Sanowar Hossain, Ziya Cevahir, Alexander Jesser and Md Nur Amin	

3. Security and Safety in Hardware Design

Securing SoC: A Scalable Hardware Security Verification Methodology.....	63
Muhammad Abdullah Al Faisal, Jaimini Nagar, Thorsten Dworzak, Sebastian Simon, Ulrich Heinkel and DJones Lettnin	
Reliable and Real-Time Anomaly Detection for Safety-Relevant Systems.....	69
Hagen Heermann, Johannes Koch and Christoph Grimm
