

Table of Contents

Session 1: Grid Modelling

M. Sc. Cornelius Heck – 50Hertz Transmission GmbH

- 01 Quantitative comparison of power system operation using angle-based control versus frequency-based Control..... 7**
Shahriar Sheybani, Hassan Alhomsy, Dirk Westermann – TU Ilmenau
- 02 Inertia Assessment of Interconnected Power Systems Based on Frequency and Tie-line Power Flow Measurements..... 13**
Adrian Terstege, Dominik Frauenknecht, Ilya Burlakin, Matthias Luther, Chris Heyde, Jan Henzgen – FAU Erlangen/ Siemens AG
- 03 Efficient method for calculating the reactive power supply by applying analytical load flow calculations 19**
Wendelin Angermann, Robert Schürhuber – TU Graz
- 04 Modular Synthesis of DC Grids through Ordinary Differential Equations 25**
Anton Wichmann, Robert Annuth, Christian Becker – TU Hamburg

Session 2: Inverter based grids (1)

Dipl.-Ing. Robin Weiß - TU Dresden

- 05 Evaluating Grid-forming Converter Performance: Insights from Power Hardware-in-the-Loop Testing..... 31**
Gregor Schöpf, Philipp Hackl, Ziqian Zhang, Robert Schuerhuber – TU Graz
- 06 Employing a Reduced Component Count Inverter Fed by Multiple Sources for Grid Support... 36**
Gabriel Maier Cocco, João Pedro Scherer Cipriani, Christoph Sauer, Martin Wolter, Fábio Ecke Bisogno, Humberto Pinheiro - OVGU Magdeburg
- 07 Virtual impedance concept for voltage angle-based operation in converter-dominated grids 43**
Kiarash Ghanbariadi, Hassan Alhomsy, Dirk Westermann – TU Ilmenau
- 08 Using a Doubly Fed Induction Machine (DFIM) in an Active Filter for Grid Commutated Rectifiers - A Feasibility Study 49**
Ludwig Jostes, Simon Puteanus – TU Dresden

Session 3: Inverter based grids (2)

Prof. Dr.-Ing. Peter Schegner - TU Dresden

- 09 Hysteresis Current Control for the Three-Phase PFC-Rectifier with two AC side Transistors BIErectifier P2S6..... 55**
Simon Peter, Liska Steenbock, Karl Stephan Stille, Jan Boris Loesenbeck – Bielefeld University of Applied Sciences and Arts

- 10 Open-Circuit Fault Detection and Localization in Modular Multilevel Converters Based on Transformer Neural Networks..... 61**
Navid Rajabi, Alireza Pourfaraj, Ahmad Kalhor, Hossein Imaneini – CAU Kiel/University of Teheran
- 11 An Extendable High Step-up DC-DC Converter with Quasi-Parabolic Voltage Gain..... 67**
Kavian Kamalinejad, Seyed Hossein Aleyasin, Mehdi Abbasi Ghadi, Alireza Pourfaraj, Hossein Imaneini - CAU Kiel/ University of Teheran
- 12 Comparison of different grid modeling structures for fault ride through analysis 72**
Darko Brankovic, Robert Schürhuber, Herwig Renner – TU Graz

Session 4: Electricity Market

M. Sc. Martin Lieberwirth – TU Dresden

- 13 Impact of Locational Marginal Electricity Pricing on future Industrial Energy Systems in Germany 79**
Felix Flatter, Lisa Reis, Stefan Goetz - University of Kaiserslautern-Landau
- 14 Optimized Sizing of Battery Energy Storage Systems in the Energy Arbitrage Business for Industrial Customers..... 85**
Luis van Sandbergen, Diego Hidalgo Rodríguez, Michael Römmich - Ruhr West University of Applied Sciences
- 15 Analysis of the Spatial Distribution of Electricity Theft: Case Study for Delimiting the Inspection Area 91**
Natalia Bastos de Sousa, Leonardo Silva, Vinicius J. Garcia, Kamila Stromm, Daniel P. Bernardon, Martin Wolter, Otacilio O. Carneiro Filho - OVGU Magdeburg
- 16 Smart Contracts and Transactive Energy in Microgrid Energy Management – A Review 97**
Renata Rodrigues Lautert, Martin Wolter, Luciane Neves Canha, Daniel Pinheiro Bernardon, Mauro dos Santos Ortiz – OVGU Magdeburg

Session 5: DER Integration/ Smart Grid

M. Sc. David Riebesel – FAU Erlangen

- 17 Reassessing the real world simultaneity factors for solar and wind feed-in for a medium-voltage grid..... 102**
Dennis Weispfennig, Pawel Lytaev - University Kassel
- 18 Analysis of low voltage grid state estimation with limited measurement devices..... 107**
Jonas Giebeler, Thomas Engelmann, Jens Haubrock - Bielefeld University of Applied Sciences and Arts
- 19 Potential of battery energy storage systems to avoid grid expansion in the low-voltage grid..... 113**
Julius Dresselhaus, Katrin Schulte, Katrin Handel Jan Arens - University Bielefeld
- 20 Scenario Modelling and Analysis of Burgwedel’s Energy System for Sustainable Grid Infrastructure..... 119**
Abhishek Verma, Devanand Yadav, Ines Hauer – TU Clausthal

Sector coupling, Protection and Diagnostic of grid components

Dr.-Ing. Thomas Werner – DNV GmbH

- 21 Design approach for a low carbon energy supply in buildings by combining green hydrogen with thermal and electrical components 125**
Farhang Ebrahimnezhad, Ralf Benger, Ines Hauer – TU Clausthal
- 22 Design and Planning Renewable Energy Based Hydrogen Refueling Station for Trains 131**
Amine Drissi, Mohammed Ouassaid - Mohammed V University in Rabat, Morocco
- 23 Evaluation of Effect of Submarine Cable Models on Distance Protection Performance..... 137**
Muhammad Zeeshan Khattak, Thanakorn Penthong, Mirko Ginocchi, Nisai Fuengwarodsakul, Ferdinanda Ponci, Antonello Monti - KMUTNB, Bangkok, Thailand/ RWTH Aachen
- 24 Employment of Thermal Cable Reserves for Curative Congestion Management 143**
Carsten Thomas Gatermann, Franz Linke, Dirk Westermann – TU Ilmenau
