CONTENTS

FOREWORD.....	5
1 Scope.....	7
2 Normative references.....	7
3 Terms and definitions	7
3.1 Active and passive filters	8
3.2 Active filter topologies.....	8
shunt active filter	8
3.3 Power semiconductor terms.....	9
3.4 Converter topologies.....	9
4 Active filters in HVDC applications	9
4.1 General	9
4.2 Semiconductor devices available for active filters.....	11
5 Active d.c. filters	11
5.1 Harmonic disturbances on the d.c. side.....	11
5.2 Description of active d.c. filters	12
5.2.1 General	12
5.2.2 Types of converters available.....	12
5.2.3 Connections of the active d.c. filter	13
5.2.4 Characteristics of installed active d.c. filters	15
5.3 Main components in an d.c. active filter.....	16
5.3.1 General	16
5.3.2 Passive part.....	16
5.3.3 Current transducer.....	18
5.3.4 Control system.....	18
5.3.5 Amplifier	19
5.3.6 Transformer.....	19
5.3.7 Protection circuit and arrester	19
5.3.8 Bypass switch and disconnectors	19
5.4 Active d.c. filter control	19
5.4.1 General	19
5.4.2 Active d.c. filter control methods	20
5.5 Example – Performance of the Skagerrak 3 HVDC Intertie active d.c. filter.....	23
5.6 Conclusions on active d.c. filters.....	24
6 Active a.c. filters in HVDC applications.....	25
6.1 General	25
6.2 Harmonic disturbances on the a.c. side of a HVDC system.....	25
6.3 Passive filters	26
6.3.1 Conventional passive filters.....	26
6.3.2 Continuously tuned passive filters	26
6.4 Reasons for using active filters in HVDC systems	27
6.5 Operation principles of active filters	28
6.5.1 Shunt connected active filter	28
6.5.2 Series connected active filter	29
6.6 Parallel and series configuration	29
6.6.1 General	29
6.6.2 Hybrid filter schemes	29
6.7 Converter configurations.....	30

6.7.1	Converters.....	30
6.8	Active a.c. filter configurations	32
6.8.1	Active a.c. filters for low voltage application	32
6.8.2	Active a.c. filters for medium voltage application	33
6.8.3	Active a.c. filters for HVDC applications	33
6.9	Series connected active filters	34
6.10	Control system	34
6.10.1	General	34
6.10.2	Description of a generic active power filter controller	35
6.10.3	Calculation of reference current	36
6.10.4	Synchronous reference frame (SRF)	37
6.10.5	Other control approaches.....	37
6.10.6	HVDC a.c. active filter control approach	38
6.11	Existing active a.c. filter applications.....	38
6.11.1	Low and medium voltage.....	38
6.11.2	High voltage applications	38
6.12	Overview on filter solutions for HVDC systems.....	39
6.12.1	Solution with conventional passive filters.....	39
6.12.2	Solution with continuously tuned passive filters	40
6.12.3	Solution with active filters.....	40
6.12.4	Solution with continuously tuned passive filters and active filters	41
6.12.5	Study cases with the CIGRÉ HVDC model.....	41
6.13	ACfilters for HVDC installations using VSC	43
6.14	Conclusions on active a.c. filters.....	43
Bibliography		45

INTERNATIONAL ELECTROTECHNICAL COMMISSION

HIGH-VOLTAGE DIRECT CURRENT (HVDC) SYSTEMS – APPLICATION OF ACTIVE FILTERS

FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

The main task of IEC technical committees is to prepare International Standards. However, a technical committee may propose the publication of a technical report when it has collected data of a different kind from that which is normally published as an International Standard, for example "state of the art".

This Technical Report cancels and replaces IEC/PAS 62544 published in 2011. This first edition constitutes a technical revision.

IEC/TR 62544, which is a technical report, has been prepared by subcommittee 22F: Power electronics for electrical transmission and distribution systems, of IEC technical committee 22: Power electronics.

The text of this technical report is based on the following documents:

Enquiry draft	Report on voting
22F/242/DTR	22F/250/RVC

Full information on the voting for the approval of this technical report can be found in the report on voting indicated in the above table.

This publication has been drafted in accordance with the ISO/IEC Directives, Part 2.

The committee has decided that the contents of this publication will remain unchanged until the stability date indicated on the IEC web site under "<http://webstore.iec.ch>" in the data related to the specific publication. At this date, the publication will be

- reconfirmed,
- withdrawn,
- replaced by a revised edition, or
- amended.

A bilingual version of this publication may be issued at a later date.

HIGH-VOLTAGE DIRECT CURRENT (HVDC) SYSTEMS – APPLICATION OF ACTIVE FILTERS

1 Scope

This technical report gives general guidance on the subject of active filters for use in high-voltage direct current (HVDC) power transmission. It describes systems where active devices are used primarily to achieve a reduction in harmonics in the d.c. or a.c. systems. This excludes the use of automatically retuned components.

The various types of circuit that can be used for active filters are described in the report, along with their principal operational characteristics and typical applications. The overall aim is to provide guidance for purchasers to assist with the task of specifying active filters as part of HVDC converters.

Passive filters are specifically excluded from this report.

2 Normative references

The following referenced documents are indispensable for the application of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.
