## INTERNATIONAL ELECTROTECHNICAL COMMISSION

---

**QI SPECIFICATION VERSION 2.0 –**
**Part 6: Communications Protocol****FOREWORD**

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as “IEC Publication(s)”). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) IEC draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). IEC takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, IEC had not received notice of (a) patent(s), which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at <https://patents.iec.ch>. IEC shall not be held responsible for identifying any or all such patent rights.

IEC 63563-6 has been prepared by technical area 15: Wireless Power Transfer, of IEC technical committee 100: Audio, video and multimedia systems and equipment. It is an International Standard.

It is based on *Qi Specification version 2.0, Communications Protocol* and was submitted as a Fast-Track document.

The text of this International Standard is based on the following documents:

Draft	Report on voting
100/4251/FDIS	100/4281/RVD

Full information on the voting for its approval can be found in the report on voting indicated in the above table.

The language used for the development of this International Standard is English.

The structure and editorial rules used in this publication reflect the practice of the organization which submitted it.

This document was developed in accordance with ISO/IEC Directives, Part 1 and ISO/IEC Directives, IEC Supplement available at [www.iec.ch/members\\_experts/refdocs](http://www.iec.ch/members_experts/refdocs). The main document types developed by IEC are described in greater detail at [www.iec.ch/publications](http://www.iec.ch/publications).

The committee has decided that the contents of this document will remain unchanged until the stability date indicated on the IEC website under [webstore.iec.ch](http://webstore.iec.ch) in the data related to the specific document. At this date, the document will be

- reconfirmed,
- withdrawn, or
- revised.

## RELEASE HISTORY

Specification Version	Release Date	Description
v2.0 Final Draft	April 2023	Initial release of the v2.0 Qi Specification.

# Table of Contents

- 1 General ..... 3**
  - 1.1 Structure of the Qi Specification..... 3
  - 1.2 Scope ..... 4
  - 1.3 Compliance..... 4
  - 1.4 References..... 4
  - 1.5 Conventions ..... 5
  - 1.6 Power Profiles..... 7
  
- 2 Overview ..... 8**
  - 2.1 Protocol phases..... 8
  - 2.2 Power Transfer Contract..... 10
  - 2.3 Data packet types ..... 15
  - 2.4 High-level messages and data transport streams..... 16
  - 2.5 Backward compatibility..... 17
  
- 3 Power Receiver and Power Transmitter identification ..... 18**
  
- 4 Ping phase ..... 19**
  - 4.1 Ping phase state diagram..... 21
  - 4.2 Ping phase timings..... 24
  
- 5 Configuration phase ..... 28**
  - 5.1 Configuration phase state diagram..... 29
  - 5.2 Configuration phase timings..... 34
  
- 6 Negotiation phase ..... 37**
  - 6.1 Negotiable elements of the Power Transfer Contract..... 39
  - 6.2 Updating the Power Transfer Contract ..... 40
  - 6.3 Foreign Object Detection support..... 41
  - 6.4 Wireless power ID..... 42
  - 6.5 NFC tag protection support..... 43
  - 6.6 Negotiation phase state diagram ..... 44
  - 6.7 Negotiation phase timings ..... 56
  
- 7 Power transfer phase ..... 61**
  - 7.1 Power transfer state diagram ..... 63
  - 7.2 Data transport stream ..... 69
  - 7.3 Power transfer phase timings..... 85

**8 Power Receiver data packets . . . . . 94**

8.1	Auxiliary Data Control—ADC (0x25; simple query) . . . . .	96
8.2	Auxiliary Data Transport—ADT (multiple header codes; simple query) . . . . .	97
8.3	Charge Status—CHS (0x05; status update) . . . . .	98
8.4	Configuration—CFG (0x51; simple query) . . . . .	99
8.5	Control Error—CE (0x03; power control) . . . . .	101
8.6	Data Stream Response—DSR (0x15; data request) . . . . .	102
8.7	End Power Transfer—EPT (0x02; power control) . . . . .	103
8.8	Extended Identification—XID (0x81; status update) . . . . .	105
8.9	FOD Status—FOD (0x22; simple query) . . . . .	106
8.10	General Request—GRQ (0x07; data request) . . . . .	108
8.11	Identification—ID (0x71; status update) . . . . .	109
8.12	Power Control Hold-off—PCH (0x06; status update) . . . . .	110
8.13	Proprietary—PROP (multiple headers; multiple types) . . . . .	111
8.14	Received Power—RP8 (0x04; status update) . . . . .	112
8.15	Received Power—RP (0x31; simple query) . . . . .	113
8.16	Renegotiate—NEGO (0x09; simple query) . . . . .	115
8.17	Signal Strength—SIG (0x01; status update) . . . . .	116
8.18	Specific Request—SRQ (0x20; simple query) . . . . .	117
8.19	Wireless Power ID—WPID (0x54, 0x55; simple query) . . . . .	125
8.20	Reserved . . . . .	126

**9 Power Transmitter data packets . . . . . 127**

9.1	Auxiliary Data Control—ADC (0x25) . . . . .	129
9.2	Auxiliary Data Transport—ADT (multiple header codes) . . . . .	130
9.3	Data Not Available—NULL (0x00) . . . . .	131
9.4	Power Transmitter Capabilities—CAP (0x31) . . . . .	132
9.5	Power Transmitter Extended Capabilities—XCAP (0x32) . . . . .	133
9.6	Power Transmitter Identification—ID (0x30) . . . . .	134
9.7	Proprietary—PROP (multiple headers) . . . . .	135
9.8	Reserved . . . . .	136

# 1 General

The Wireless Power Consortium (WPC) is a worldwide organization that aims to develop and promote global standards for wireless power transfer in various application areas. A first application area comprises flat-surface devices such as mobile phones and chargers in the Baseline Power Profile (up to 5 W) and Extended Power Profile (above 5 W).

## 1.1 Structure of the Qi Specification

### General documents

- Introduction
- Glossary, Acronyms, and Symbols

### System description documents

- Mechanical, Thermal, and User Interface
- Power Delivery
- Communications Physical Layer
- Communications Protocol
- Foreign Object Detection
- NFC Tag Protection
- Authentication Protocol

## 1.2 Scope

The *Qi Specification, Communications Protocol* (this document) defines the messaging between a Power Transmitter and a Power Receiver. The primary purpose of this messaging is to set up and control the power transfer. As a secondary purpose, it provides a transport mechanism for higher-level applications such as Authentication. The communications protocol comprises both the required order and timing relations of successive messages.

## 1.3 Compliance

All provisions in the *Qi Specification* are mandatory, unless specifically indicated as recommended, optional, note, example, or informative. Verbal expression of provisions in this Specification follow the rules provided in ISO/IEC Directives, Part 2.

**Table 1: Verbal forms for expressions of provisions**

Provision	Verbal form
requirement	“shall” or “shall not”
recommendation	“should” or “should not”
permission	“may” or “may not”
capability	“can” or “cannot”

## 1.4 References

For undated references, the most recently published document applies. The most recent WPC publications can be downloaded from <http://www.wirelesspowerconsortium.com>.
