Foreword

ISO (the International Organization for Standardization) and IEC (the International Electrotechnical Commission) form the specialized system for worldwide standardization. National bodies that are members of ISO or IEC participate in the development of International Standards through technical committees established by the respective organization to deal with particular fields of technical activity. ISO and IEC technical committees collaborate in fields of mutual interest. Other international organizations, governmental and non-governmental, in liaison with ISO and IEC, also take part in the work. In the field of information technology, ISO and IEC have established a joint technical committee, ISO/IEC JTC 1.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of document should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO and IEC shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see the following URL: www.iso.org/iso/foreword.html.

ISO/IEC 17826 was prepared by SNIA and was adopted, under the PAS procedure, by Joint Technical Committee ISO/IEC JTC 1, *Information technology*, in parallel with its approval by national bodies of ISO and IEC.

This second edition cancels and replaces the first edition (ISO/IEC 17826:2012), which has been technically revised.

Cloud Data Management Interface (CDMI™)

Version 1.1.1

ABSTRACT: This CDMI International Standard is intended for application developers who are implementing or using cloud storage. It documents how to access cloud storage and to manage the data stored there.

This document has been released and approved by the SNIA. The SNIA believes that the ideas, methodologies, and technologies described in this document accurately represent the SNIA goals and are appropriate for widespread distribution. Suggestion for revision should be directed to <http://www.snia.org/feedback/>.

Version	Date	Originator	Comments
1.1.1	March 19, 2015	CDMI TWG	Released as a SNIA Technical Position.

Contents

SECTION 1 - CDMI Preamble	1
Introduction	2
1 Scope	4
2 Normative references	4
3 Terms, acronyms, and definitions	6
4 Conventions	10
4.1 Interface format	10
4.2 Typographical conventions	10
4.3 Request and response body requirements	11
4.4 Key word requirements	11
5 Overview of cloud storage	13
5.1 Introduction	13
5.2 What is cloud storage?	13
5.3 Data storage as a Service	13
5.4 Data management for cloud storage	15
5.5 Data and container management	16
5.6 Reference model for cloud storage interfaces	16
5.7 Cloud Data Management Interface	17
5.8 Object model for CDMI	18
5.9 CDMI metadata	19
5.10 Object ID	20
5.11 CDMI object ID format	20
5.12 Security	21
5.12.1 Security objectives	21
5.12.2 HTTP security	22
5.12.3 Client authentication	22
5.12.4 Use of TLS and HTTP	23
5.12.5 Further information	23
5.13 Required HTTP support	23
5.13.1 RFC 2616 support requirements	23
5.13.2 Content-type negotiation	23
5.13.3 Range support	23
5.13.4 URI escaping	24
5.13.5 Use of URIs	24
5.13.6 Reserved characters	25
5.14 Time representations	25
5.15 Backwards compatibility	25
5.15.1 Value transfer encoding	25
5.15.2 Container export capabilities	26
5.16 Object references	26
SECTION 2 - Basic Cloud Storage	28
6 Data object resource operations using HTTP	29
6.1 Overview	29
6.2 Create a data object using HTTP	29
6.2.1 Synopsis	29

6.2.2	Capabilities	29
6.2.3	Request headers	30
6.2.4	Request message body	30
6.2.5	Response headers	30
6.2.6	Response message body	30
6.2.7	Response status	30
6.2.8	Example	31
6.3	Read a data object using HTTP	31
6.3.1	Synopsis	31
6.3.2	Capabilities	31
6.3.3	Request header	31
6.3.4	Request message body	31
6.3.5	Response headers	32
6.3.6	Response message body	32
6.3.7	Response status	32
6.3.8	Examples	32
6.4	Update a data object using HTTP	33
6.4.1	Synopsis	33
6.4.2	Capabilities	33
6.4.3	Request headers	33
6.4.4	Request message body	34
6.4.5	Response header	34
6.4.6	Response message body	34
6.4.7	Response status	34
6.4.8	Examples	34
6.5	Delete a data object using HTTP	35
6.5.1	Synopsis	35
6.5.2	Capability	35
6.5.3	Request headers	35
6.5.4	Request message body	35
6.5.5	Response headers	35
6.5.6	Response message body	35
6.5.7	Response status	36
6.5.8	Example	36
7	Container object resource operations using HTTP	37
7.1	Overview	37
7.2	Create a container object using HTTP	37
7.2.1	Synopsis	37
7.2.2	Capability	37
7.2.3	Request headers	38
7.2.4	Request message body	38
7.2.5	Response headers	38
7.2.6	Response message body	38
7.2.7	Response status	38
7.2.8	Example	38
7.3	Read a container object using HTTP	38
7.4	Update a container object using HTTP	38
7.5	Delete a container object using HTTP	39
7.5.1	Synopsis	39
7.5.2	Capability	39
7.5.3	Request headers	39
7.5.4	Request message body	39
7.5.5	Response headers	39
7.5.6	Response message body	39
7.5.7	Response status	40
7.5.8	Example	40
7.6	Create (POST) a new data object using HTTP	40

7.6.1	Synopsis	40
7.6.2	Capabilities	41
7.6.3	Request headers	41
7.6.4	Request message body	41
7.6.5	Response header	41
7.6.6	Response message body	42
7.6.7	Response status	42
7.6.8	Examples	42
SECTION 3 - CDMI Core	43	
8 Data object resource operations using CDMI	44	
8.1	Overview	44
8.1.1	Data object metadata	45
8.1.2	Data object consistency	45
8.1.3	Data object representations	46
8.2	Create a data object using CDMI	46
8.2.1	Synopsis	46
8.2.2	Delayed completion of create	46
8.2.3	Capabilities	47
8.2.4	Request headers	47
8.2.5	Request message body	48
8.2.6	Response headers	51
8.2.7	Response message body	51
8.2.8	Response status	52
8.2.9	Examples	52
8.3	Read a data object using CDMI	55
8.3.1	Synopsis	55
8.3.2	Capabilities	55
8.3.3	Request headers	56
8.3.4	Request message body	56
8.3.5	Response headers	56
8.3.6	Response message body	57
8.3.7	Response status	59
8.3.8	Examples	59
8.4	Update a data object using CDMI	62
8.4.1	Synopsis	62
8.4.2	Capabilities	63
8.4.3	Request headers	63
8.4.4	Request message body	64
8.4.5	Response header	67
8.4.6	Response message body	67
8.4.7	Response status	67
8.4.8	Examples	67
8.5	Delete a data object using CDMI	71
8.5.1	Synopsis	71
8.5.2	Capability	71
8.5.3	Request header	71
8.5.4	Request message body	71
8.5.5	Response headers	71
8.5.6	Response message body	71
8.5.7	Response status	72
8.5.8	Example	72
9 Container object resource operations using CDMI	73	
9.1	Overview	73

9.1.1	Container metadata	74
9.1.2	Reserved container names	74
9.1.3	Container object addressing	74
9.1.4	Container object representations	75
9.2	Create a container object using CDMI	75
9.2.1	Synopsis	75
9.2.2	Delayed completion of create	75
9.2.3	Capabilities	76
9.2.4	Request headers	76
9.2.5	Request message body	77
9.2.6	Response headers	79
9.2.7	Response message body	79
9.2.8	Response status	81
9.2.9	Examples	81
9.3	Read a container object using CDMI	83
9.3.1	Synopsis	83
9.3.2	Capabilities	83
9.3.3	Request headers	84
9.3.4	Request message body	84
9.3.5	Response headers	84
9.3.6	Response message body	84
9.3.7	Response status	86
9.3.8	Examples	86
9.4	Update a container object using CDMI	88
9.4.1	Synopsis	88
9.4.2	Delayed completion of snapshot	88
9.4.3	Capabilities	89
9.4.4	Request headers	89
9.4.5	Request message body	90
9.4.6	Response header	92
9.4.7	Response message body	92
9.4.8	Response status	92
9.4.9	Examples	92
9.5	Delete a container object using CDMI	93
9.5.1	Synopsis	93
9.5.2	Capability	93
9.5.3	Request header	94
9.5.4	Request message body	94
9.5.5	Response headers	94
9.5.6	Response message body	94
9.5.7	Response status	94
9.5.8	Example	94
9.6	Create (POST) a new data object using CDMI	95
9.6.1	Synopsis	95
9.6.2	Delayed completion of create	95
9.6.3	Capabilities	96
9.6.4	Request headers	97
9.6.5	Request message body	98
9.6.6	Response headers	101
9.6.7	Response message body	101
9.6.8	Response status	102
9.6.9	Examples	103
9.7	Create (POST) a new queue object using CDMI	105
9.7.1	Synopsis	105
9.7.2	Delayed completion of create	105
9.7.3	Capabilities	106
9.7.4	Request headers	107
9.7.5	Request message body	107

9.7.6 Response headers	108
9.7.7 Response message body	108
9.7.8 Response status	110
9.7.9 Example	110
SECTION 4 - CDMI Advanced	112
10 Domain object resource operations using CDMI	113
10.1 Overview	113
10.1.1 Domain object metadata	114
10.1.2 Domain object summaries	114
10.1.3 Domain object membership	117
10.1.4 Domain usage in access control	119
10.1.5 Domain object representations	120
10.2 Create a domain object using CDMI	120
10.2.1 Synopsis	120
10.2.2 Capabilities	120
10.2.3 Request headers	120
10.2.4 Request message body	121
10.2.5 Response headers	122
10.2.6 Response message body	122
10.2.7 Response status	123
10.2.8 Example	123
10.3 Read a domain object using CDMI	124
10.3.1 Synopsis	124
10.3.2 Capabilities	124
10.3.3 Request headers	124
10.3.4 Request message body	124
10.3.5 Response headers	125
10.3.6 Response message body	125
10.3.7 Response status	126
10.3.8 Examples	126
10.4 Update a domain object using CDMI	127
10.4.1 Synopsis	127
10.4.2 Capability	128
10.4.3 Request headers	128
10.4.4 Request message body	128
10.4.5 Response header	129
10.4.6 Response message body	129
10.4.7 Response status	130
10.4.8 Example	130
10.5 Delete a domain object using CDMI	130
10.5.1 Synopsis	130
10.5.2 Capability	131
10.5.3 Request header	131
10.5.4 Request message body	131
10.5.5 Response headers	131
10.5.6 Response message body	131
10.5.7 Response status	131
10.5.8 Example	132
11 Queue object resource operations using CDMI	133
11.1 Overview	133
11.1.1 Queue object metadata	134
11.1.2 Queue object addressing	134
11.1.3 Queue object representations	134

11.2 Create a queue object using CDMI	134
11.2.1 Synopsis	134
11.2.2 Delayed completion of create	135
11.2.3 Capabilities	135
11.2.4 Request headers	136
11.2.5 Request message body	136
11.2.6 Response headers	138
11.2.7 Response message body	138
11.2.8 Response status	139
11.2.9 Examples	140
11.3 Read a queue object using CDMI	141
11.3.1 Synopsis	141
11.3.2 Capabilities	141
11.3.3 Request headers	142
11.3.4 Request message body	142
11.3.5 Response headers	142
11.3.6 Response message body	142
11.3.7 Response status	145
11.3.8 Examples	145
11.4 Update a queue object using CDMI	148
11.4.1 Synopsis	148
11.4.2 Capability	148
11.4.3 Request headers	148
11.4.4 Request message body	149
11.4.5 Response header	150
11.4.6 Response message body	150
11.4.7 Response status	150
11.4.8 Examples	150
11.5 Delete a queue object using CDMI	151
11.5.1 Synopsis	151
11.5.2 Capability	151
11.5.3 Request header	151
11.5.4 Request message body	152
11.5.5 Response headers	152
11.5.6 Response message body	152
11.5.7 Response status	152
11.5.8 Example	152
11.6 Enqueue a new queue value using CDMI	152
11.6.1 Synopsis	152
11.6.2 Capabilities	153
11.6.3 Request headers	153
11.6.4 Request message body	153
11.6.5 Response headers	155
11.6.6 Response message body	155
11.6.7 Response status	156
11.6.8 Examples	156
11.7 Delete a queue object value using CDMI	159
11.7.1 Synopsis	159
11.7.2 Capability	159
11.7.3 Request header	159
11.7.4 Request message body	159
11.7.5 Response headers	160
11.7.6 Response message body	160
11.7.7 Response status	160
11.7.8 Examples	160
12 Capability object resource operations using CDMI	161
12.1 Overview	161

12.1.1	Cloud storage system-wide capabilities	162
12.1.2	Storage system metadata capabilities	165
12.1.3	Data system metadata capabilities	165
12.1.4	Data object capabilities	168
12.1.5	Container capabilities	169
12.1.6	Domain object capabilities	171
12.1.7	Queue object capabilities	172
12.1.8	Capability object representations	172
12.2	Read a capabilities object using CDMI	173
12.2.1	Synopsis	173
12.2.2	Capability	173
12.2.3	Request headers	173
12.2.4	Request message body	173
12.2.5	Response headers	174
12.2.6	Response message body	174
12.2.7	Response status	175
12.2.8	Examples	175
13	Exported protocols	177
13.1	Overview	177
13.2	Exported protocol structure	178
13.2.1	Mapping names from CDMI to another protocol	179
13.2.1.1	Capabilities	179
13.2.1.2	Domains	179
13.2.1.3	Caching	179
13.2.1.4	Groups	180
13.2.1.5	Synopsis	180
13.2.2	Administrative users	181
13.2.3	User and groupname mapping syntax and evaluation rules	182
13.3	Discovering and mounting containers via foreign protocols	183
13.4	NFS exported protocol	184
13.5	CIFS exported protocol	186
13.6	OCCI exported protocol	187
13.7	iSCSI export modifications	187
13.7.1	Read container	187
13.7.2	Create and update containers	188
13.7.3	Modify an export	188
13.8	WebDAV exported protocol	188
14	CDMI snapshots	190
15	Serialization/deserialization	191
15.1	Overview	191
15.2	Exporting serialized data	191
15.3	Importing serialized data	191
15.3.1	Canonical format	192
15.3.2	Example JSON canonical serialized format	192
16	Metadata	194
16.1	Access control	194
16.1.1	ACL and ACE structure	194
16.1.2	ACE types	194
16.1.3	ACE who	194
16.1.4	ACE flags	195
16.1.5	ACE bit masks	196
16.1.6	ACL evaluation	198
16.1.7	Example ACE mask expressions	200
16.1.8	Canonical format for ACE hexadecimal quantities	201

16.1.9 JSON format for ACLs	201
16.2 Support for user metadata	202
16.3 Support for storage system metadata	202
16.4 Support for data system metadata	204
16.5 Support for provided data system metadata	210
16.6 Metadata update operations	211
17 Retention and hold management	212
17.1 Introduction	212
17.2 Retention management disciplines	212
17.3 CDMI retention	212
17.3.1 Overview	212
17.3.2 Examples	213
17.4 CDMI hold	214
17.4.1 Overview	214
17.4.2 Examples	216
17.5 CDMI auto-deletion	217
17.6 Retention security considerations	217
18 Scope specification	219
18.1 Introduction	219
18.2 Examples	219
18.3 Query matching expressions	221
19 Results specification	226
19.1 Introduction	226
19.2 Examples	226
20 Logging	228
20.1 Overview	228
20.2 Object logging	228
20.3 Security logging	228
20.4 Data management logging	229
20.5 Logging queues	229
20.6 Logging security considerations	231
21 Notification queues	232
21.1 Overview	232
21.2 Required metadata	232
21.3 System-created metadata	235
22 Query queues	236
22.1 Overview	236
22.2 Required metadata	236
22.3 System-created metadata	237
22.4 Extending CDMI query	238
SECTION 5 - CDMI Annexes	239
Annex A (informative) Extensions	240
A.1 Overview	240
A.2 Summary metadata for bandwidth	240
A.2.1 Overview	240

A.2.2 Changes to CDMI 1.1	240
A.3 Expiring Access Control Entries (ACEs)	242
A.3.1 Overview	242
A.3.2 Changes to CDMI 1.1	242
A.4 Group storage system metadata	243
A.4.1 Overview	243
A.4.2 Changes to CDMI 1.1	243
A.5 Versioning	244
A.5.1 Overview	244
A.5.2 Changes to CDMI 1.1	244
Bibliography	259

Section I

CDMI Preamble

Introduction

This Cloud Data Management Interface (CDMI™) International Standard is intended for application developers who are implementing or using cloud storage. It documents how to access cloud storage and to manage the data stored there.

This document is organized as follows:

1 - Scope	Defines the scope of this document
2 - References	Lists the normative references for this document
3 - Terms	Provides terminology used in this document
4 - Conventions	Describes the conventions used in presenting the interfaces and the typographical conventions used in this document
5 - Overview of Cloud Storage	Provides a brief overview of cloud storage and details the philosophy behind this International Standard as a model for the operations
6 - Data Object Resource Operations using HTTP	Provides the normative standard of data object resource operations using HTTP
7 - Container Object Resource Operations using HTTP	Provides the normative standard of container object resource operations using HTTP
8 - Data Object Resource Operations using CDMI	Provides the normative standard of data object resource operations using CDMI
9 - Container Object Resource Operations using CDMI	Provides the normative standard of container object resource operations using CDMI
10 - Domain Object Resource Operations using CDMI	Provides the normative standard of domain object resource operations using CDMI
11 - Queue Object Resource Operations using CDMI	Provides the normative standard of queue object resource operations using CDMI
12 - Capability Object Resource Operations using CDMI	Provides the normative standard of capability object resource operations using CDMI
13 - Exported Protocols	Discusses how virtual machines in the cloud computing environment can use the exported protocols from CDMI containers
14 - Snapshots	Discusses how snapshots are accessed under CDMI containers
15 - Serialization/Deserialization	Discusses serialization and deserialization, including import and export of serialized data under CDMI
16 - Metadata	Provides the normative standard of the metadata used in the interface
17 - Retention and Hold Management	Describes the optional retention management disciplines to be implemented into the system management functions
18 - Scope Specification	Describes the structure of the scope specification for JSON objects
19 - Results Specification	Provides a standardized mechanism to define subsets of CDMI object contents

20 - Logging	Describes CDMI functional logging for object functions, security events, data management events, and queues
21 - Notification Queues	Describes how CDMI clients may efficiently discover what changes have occurred to the system
22 - Query Queues	Describes how CDMI clients may efficiently discover what content matches a given set of metadata query criteria or full-content search criteria
Annex A - (informative) Extensions	Provides informative vendor extensions. Each extension is added to the standard when at least two vendors implement the extension.
Bibliography	Provides informative references that may contain additional useful information

1 Scope

This CDMITM International Standard specifies the interface to access cloud storage and to manage the data stored therein. This International Standard applies to developers who are implementing or using cloud storage.

2 Normative references

The following documents, in whole or in part, are normatively referenced in this document and are indispensable for its application. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

The provisions of the referenced specifications other than ISO/IEC, IEC, ISO, and ITU documents, as identified in this clause, are valid within the context of this International Standard. The reference to such a specification within this International Standard does not give it any further status within ISO/IEC. In particular, it does not give the referenced specifications the status of an International Standard.
